

The GREATEST Fish Goonch Catfish Expeditions

Our Approach:

"To catch & release the GREATEST Fish in the History of Mankind".

This is the bold mission statement at our core that helps set us apart from other Fishing Expedition Operators. The GREATEST Fish Team fully understand what is required to give our Guest Anglers the very best chance of catching and releasing a GREAT Fish from wonderful and remote locations.

At the GREATEST Fish we really **CARE** about what our Guest Anglers catch and release on every one of our trips! We carry out advanced reconnaissance trips to our chosen locations to iron out possible issues, and we **ONLY** take Guest Anglers at suitable times of the year.

We know that being at the right location, at the right time, with the right bait, presented in the right way is key to success when fishing for illusive species like the Goonch.

To this end our GREATEST Fish Guides tirelessly make sure everything is in place for our Guest Anglers to maximise their chances of catching a GREAT Fish.

The Prehistoric Goonch:

The Goonch sometimes referred to as the "Giant Devil Catfish" has to be one of the ultimate Angler challenges in freshwater. Not only is the Goonch notoriously hard to locate and trick in to taking a bait, but once hooked Goonch are very powerful fish that use the rocks in the river to avoid capture.

People think Goonch are "Slow" however they are anything but slow and swim very very fast when hooked! Our Guides describe hooking a big Goonch like hooking a "Raging Bull"!

A Goonch close up is a sight to behold and unlike any other fish. Whether cradled in the hands of a lucky Angler or seen powering effortlessly through the clear river once hooked a Goonch is an awe inspiring sight that is never forgotten.

The Goonch's rubberised skin, head, body, and fins are perfectly adapted for living in the fast rocky rivers of the Himalayan Foothills. Big Goonch can lie alongside Muggers Crocodiles and Gharials knowing they have nothing to fear, their robust stocky structure and hydrodynamic design has remained unchanged for many millennia. Quite simply only once you have hooked, landed, and seen close-up a BIG Goonch do you realise that this is a truly GREAT Fish like no other!
